1. Select the **Wi-Fi menu icon** in the top-right corner of the main OS X toolbar. The list of networks should appear in a few seconds.

2. Select the network called **Students-Secure**

3. The network will now request your credentials. Enter the **same** information you use to log in to your CSUF Portal.

4. The network certificate will be shown. Click **Continue**

5. You may be asked for the **local administrator credentials** to your computer. Enter them to finish the configuration process.

6. **You are done!** This network will auto-connect whenever you’re on campus.
